

Neustadt Community Expansion Project Virtual Open House

Presented on behalf of Enbridge Gas Inc.

Neustadt Community Expansion Project Virtual Open House

Welcome

- Press the next button to navigate to the next slide at any time.
- To return to the previous slide, press the previous button.
- You can mute the audio at any time by pressing the speaker icon.
- The presentation slides, as well as the audio script, are available for download (see the Resources tab in the top right corner).
- Questions and comments can be submitted using the questionnaire found in the Resources tab.
- If you would like to receive future Project updates, please complete the "Contact Information" section of the questionnaire.

Our Commitment

- Enbridge Gas Inc. (Enbridge) is committed to involving Indigenous communities, agencies, interest groups, and community members.
- Enbridge will provide up-to-date information in an open, honest, and respectful manner, and will carefully consider your input.
- Enbridge provides safe and reliable delivery of natural gas to more than 3.8 million residential, commercial, and industrial customers across Ontario.
- Enbridge is committed to environmental stewardship and conducts its operations in an environmentally responsible manner.

Neustadt Community Expansion Project Virtual Open House

Purpose of the Open House

- Consult with Indigenous communities, and engage with members of the public, and regulatory authorities regarding the proposed pipeline route, potential impacts, and proposed mitigations.
- Provide an opportunity for these individuals and any affected landowners and the general public to review the proposed Project, and to ask any questions and/or provide comments to representatives from Enbridge and Stantec.
- In addition to this Virtual Open House, an In-person Open House will be held at the Neustadt Community Centre (183 Enoch Street, Neustadt, ON N0G 2M0) on March 16, 2023, from 5:00 – 8:00 PM.
- Print copies of these Open House materials are also available for in-person review at:
 - The Municipality of West Grey, 402813 Grey County Road 4, R.R.2, Durham (Municipal Office)
 - Hanover Public Library, 451 10th Avenue, Hanover (Public Library)
 - West Grey Public Library, Neustadt Branch, 511 Mill Street, Neustadt (Public Library)

Neustadt Community Expansion Project

Virtual Open House

Indigenous Peoples Policy

Enbridge recognizes the diversity of Indigenous peoples who live where we work and operate. We understand from history the destructive impacts on the social and economic well-being of Indigenous Peoples. Enbridge recognizes and realizes the importance of reconciliation between Indigenous communities and the broader society. Positive relationships with Indigenous peoples, based on mutual respect and focused on achieving common goals, will create positive outcomes for Indigenous communities. Enbridge commits to pursuing sustainable relationships with Indigenous Nations and groups in proximity to where Enbridge conducts business. To achieve this, Enbridge will govern itself by the following principles:

- We recognize the legal and constitutional rights possessed by Indigenous peoples and the importance of the relationship between Indigenous Peoples and their traditional lands and resources. We commit to working with Indigenous communities in a manner that recognizes and respects those legal and constitutional rights and the traditional lands and resources to which they apply. We commit to ensuring that our projects and operations are carried out in an environmentally responsible manner.
- We understand the importance of the United Nations Declaration on the Rights of Indigenous Peoples in the context of existing Canadian law and the commitments that the government has made to protect the rights of Indigenous Peoples.
- We engage in forthright and sincere consultation with Indigenous Peoples about Enbridge projects and operations through processes that seek to achieve early and meaningful engagement. Indigenous engagement help define our projects that may occur on lands traditionally occupied by Indigenous Peoples.
- We commit to working with Indigenous Peoples to achieve benefits for them resulting from Enbridge Inc.'s projects and operations, including opportunities in training and education, employment, procurement, business development, and community development.
- We foster understanding of the history and culture of Indigenous Peoples among Enbridge employees and contractors, in order to create better relationships between Enbridge and Indigenous communities.

This commitment is a shared responsibility involving Enbridge and its affiliates, employees and contractors. We will conduct business in a manner that reflects the above principles. Enbridge will provide ongoing leadership and resources to effectively implement the above principles, including the development of implementation strategies and specific action plans. Enbridge commits to periodically review this policy so that it remains relevant and respects Indigenous culture and varied traditions.

Neustadt Community Expansion Project

Virtual Open House

Project Overview

- The Project will connect to the existing 4" steel pipeline south of Hanover, along 10th Ave. near the intersection of Regional Rd. 10 and Knappville Rd.
- The proposed pipeline will run south along Regional Rd. 10 from the tie-in point to the intersection with Queen St., turning west on Queen St. and then south on Mill St. (which becomes Jacob St.) before terminating at the intersection of Jacob St. and William St.
 - An alternate route proposes shifting the tie-in point to the crossing of 7th Ave. and 2nd St., running south along Durham Rd., following Concession 2 South Durham Rd. until it crosses Side Rd. 30, following this road south until it crosses Concession Rd. 10, and running east towards Queen St. at the boundary of the community of Neustadt.
- The proposed distribution pipeline will run along Bruce Rd. 16, Stephana St., Adam St., Barbara St., Enoch St., Forler St., Jacob St., John St., Grey Rd. 16, and Grey Rd. 9, all within the boundaries of the community of Neustadt.
- The distribution portion of the Project includes approximately 13.0 km of polyethylene natural gas main pipeline ranging from Nominal Pipe Size 2" to 6". Wherever possible, the proposed pipeline will be located within existing road allowances. In addition, approximately 1 km of 6" polyethylene reinforcement pipeline will be required to be installed along 1st St., 14th Ave., and 2nd St. within the road allowances.

Neustadt Community Expansion Project Virtual Open House

Environmental Study Process

As part of the planning process, Enbridge has retained Stantec to undertake an Environmental Study for the Project. The Environmental Study will fulfill the requirements of the Ontario Energy Board's (OEB) "*Environmental Guidelines for the Location, Construction, and Operation of Hydrocarbon Pipelines and Facilities in Ontario, 7th Edition (2016)*".

The study will:

- Undertake engagement to understand the views of interested and potentially affected parties.
- Consult with Indigenous communities to understand interests and potential impacts.
- Be conducted during the earliest phase of the Project.
- Identify potential impacts of the Project.
- Develop environmental mitigation and protective measures to avoid or reduce potential impacts.
- Develop an appropriate environmental inspection, monitoring, and follow-up program.

Neustadt Community Expansion Project Virtual Open House

Ontario Energy Board (OEB) Review and Approval Process

It is anticipated that the Environmental Report for the study will be completed in May 2023, after which Enbridge may file a Leave-to-Construct (LTC) application. The application to the OEB will include the following information on the Project:

- The need for the Project
- Environmental Report and mitigation measures
- Project costs and economics
- Pipeline design and construction
- Land requirements
- Consultation with Indigenous Communities

Additional information about the OEB
process can be found at:
www.ontarioenergyboard.ca

The OEB will then holds a public hearing to review the Project. If the OEB determines that the Project is in the public interest, it will approve the construction of the Project.

Neustadt Community Expansion Project

Virtual Open House

Consultation and Engagement

- Consultation and engagement are key components of the Environmental Report.
- At the outset of the Project, Enbridge submits a Project Description to the Ministry of Energy; upon review, the Ministry of Energy determines potential impacts on Aboriginal or treaty rights and identifies Indigenous communities that Enbridge will consult with during the entirety of the Project.
- The consultation and engagement program helps identify and address Indigenous community and stakeholder concerns and issues, provides information about the Project to the stakeholders and allows for participation in the Project review and development process.
- Input during engagement and consultation will be used to help finalize the pipeline route and mitigation plans for the project.
- Once the LTC application is made to the OEB, any party with an interest in the Project, including members of the public, can participate in the process.

Neustadt Community Expansion Project

Virtual Open House

Route Selection Process

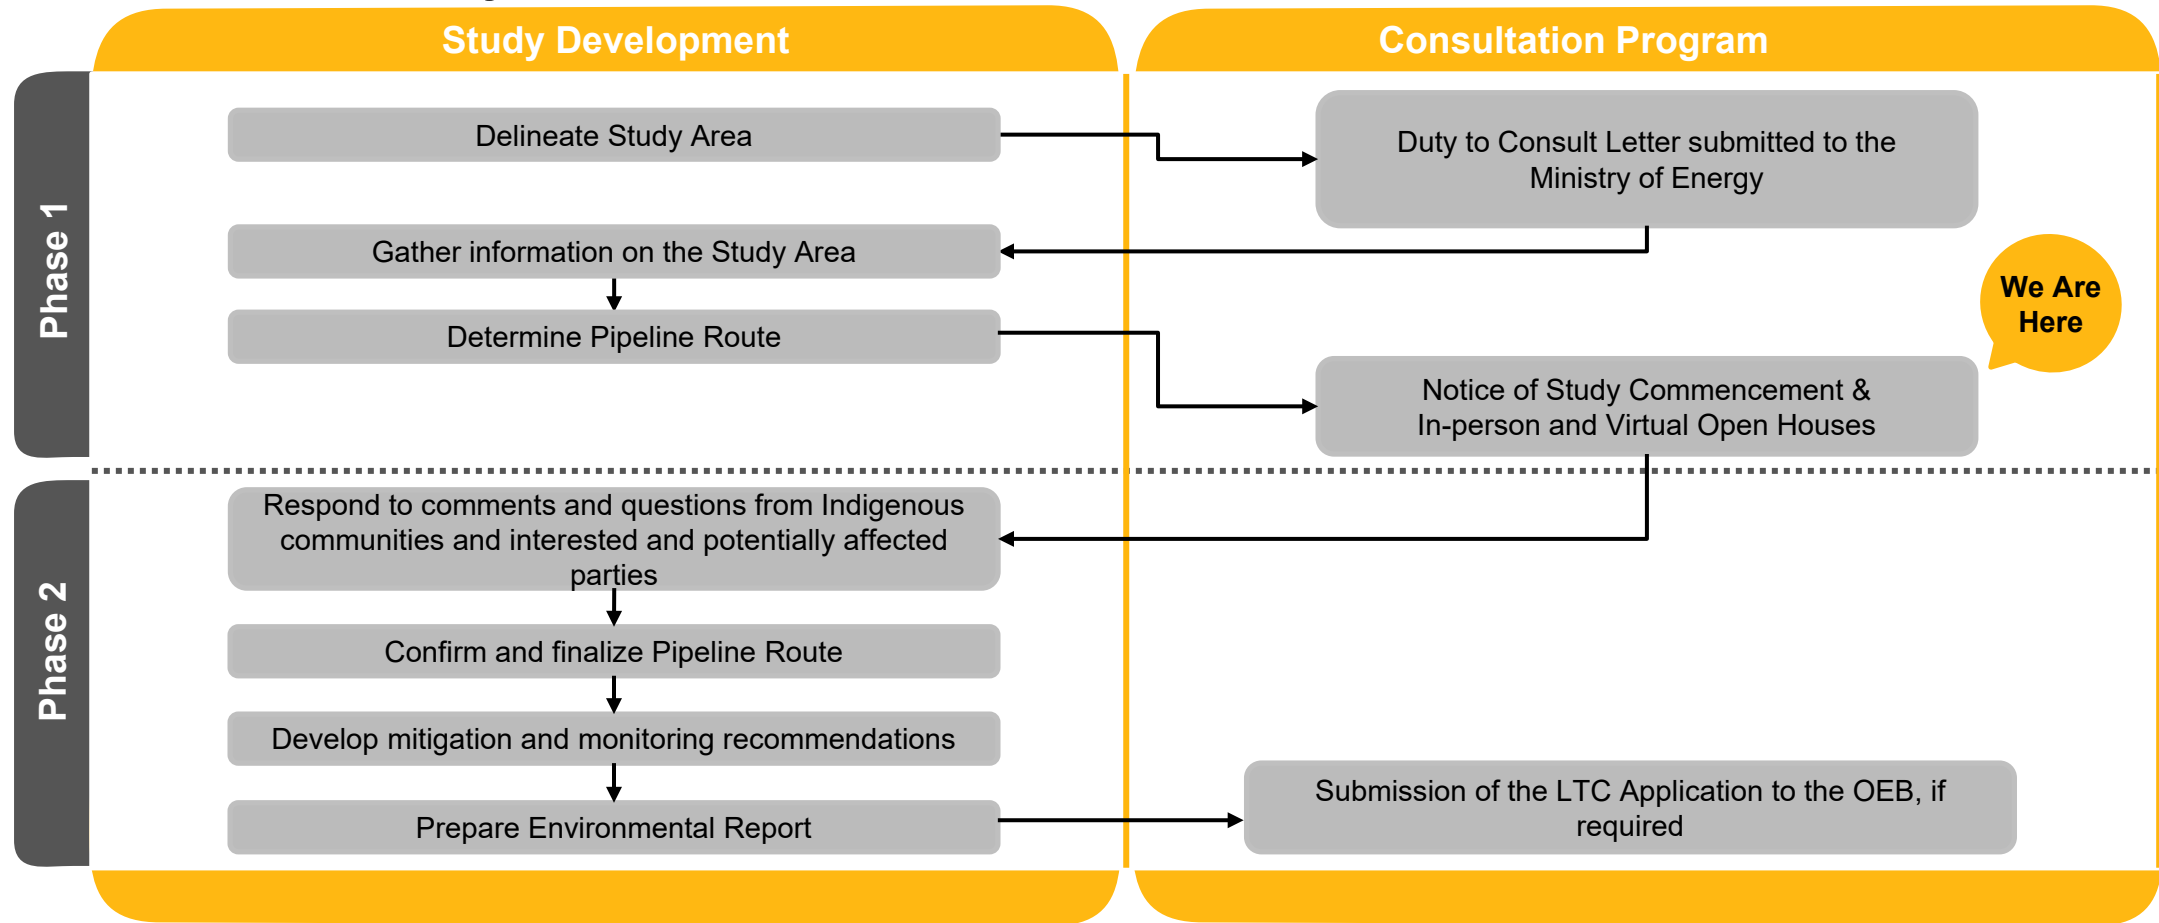

- Pipeline routing constraints include natural environmental features, topography, and socio-economic features and landscapes. Opportunities to reduce potential impacts include the ability to follow existing linear infrastructure such as road right-of-ways.
- The proposed Preliminary Preferred and Alternative Routes follow existing linear infrastructure such as existing municipal road right-of-ways and avoid, to the extent possible, existing environmental and socio-economic features.

An interactive map that shows the Preliminary Preferred Route and the Alternative Route can be accessed at: <http://www.solutions.ca/NeustadtEA>

Neustadt Community Expansion Project Virtual Open House

Environment, Health and Safety Policy

Our Commitment

- Enbridge is committed to protecting the health and safety of all individuals affected by our activities.
- Enbridge will provide a safe and healthy working environment and will not compromise the health and safety of any individual.
- Our goal is to have no incidents and mitigate impacts on the environment by working with our stakeholders, peers, and others to promote responsible environmental practices and continuous improvement.
- Enbridge is committed to environmental protection and stewardship, and recognizes that pollution prevention, biodiversity, and resource conservation are key to a sustainable environment.
- All employees are responsible and accountable for contributing to a safe working environment, for fostering safe working attitudes, and for operating in an environmentally responsible manner.

Neustadt Community Expansion Project

Virtual Open House

Access and Land Requirements

While most of the pipeline route will be constructed within municipal road allowances, some circumstances requiring access agreements, permanent easement or temporary working space during construction could result in the need for additional land outside of road allowances.

Enbridge has a comprehensive Landowner Relations Program that uses a dedicated Lands Advisor who would:

- Provide direct contact & liaison between landowners and Enbridge.
- Be available to the landowner during the length of the Project and throughout construction activities.
- Address the concerns and questions of the landowner.
- Act as a singular point of contact for all landowners.
- Address any landowner questions and any legal matters relating to the temporary use of property, access agreements, permanent easements, and impacts or remedies to property.

Neustadt Community Expansion Project Virtual Open House

Constructing an Enbridge Pipeline

- 1. Pre-construction tiling
- 2. Surveying and staking
- 3. Clearing

- 4. Right-of-way topsoil stripping
- 5. Front-end grading
- 6. Stringing pipe

- 7. Field bending pipe
- 8. Lining-up pipe
- 9. Welding process

- 10. X-ray or ultrasonic inspection, weld repair
- 11. Field coating
- 12. Digging the trench

- 13. Padding trench bottom
- 14. Final inspection and coating repair
- 15. Lowering pipe

- 16. Backfilling
- 17. Hydrostatic testing
- 18. Site restoration and post-construction tiling

Neustadt Community Expansion Project Virtual Open House

Constructing an Enbridge Pipeline (Continued)

The pipeline construction process includes various procedures, as described in the previous slide.

- **Photo 1:** Shows a typical Enbridge natural gas pipeline. The Neustadt Community Expansion Project will involve the installation of a polyethylene pipeline ranging from 2- to 6-inches and will be smaller than the pipeline shown in Photo 1.
- **Photo 2:** Represents a typical trench that is created during the installation process.
- **Photo 3:** Represents the process of backfilling a trench.
- **Photo 4:** Represents final clean-up and restoration. Once the pipeline has been installed, clean-up will involve the restoration of the RoW and other work areas. In natural areas, clean-up will involve restoring the environment (i.e., re-seeding of the RoW), and restoring ditch banks and watercourse crossings.

Neustadt Community Expansion Project Virtual Open House

Horizontal Directional Drilling (HDD) Procedures

Neustadt Community Expansion Project Virtual Open House

Socio-economic Features

The Project will mainly be constructed in existing municipal road allowances. As a result of construction, private businesses, agricultural operations, and residential land, as well as Saugeen Valley Conservation Authority land along the pipeline may be impacted.

Potential Effects

- Temporary increases in noise, dust, and air emissions.
- Increased construction traffic volumes.
- Temporary impairment of the use and enjoyment of residential and/or cottage property.
- Vegetation clearing along the pipeline route.

Example Mitigation Measures

- Provide access across the construction area.
- Restrict construction to daylight hours and adhere to applicable noise by-laws.
- Develop and implement a Traffic Control Plan.
- Place fencing at appropriate locations for safety.
- Implement a water well monitoring program.
- Making contact information for a designated Enbridge representative available prior to and throughout construction.
- Dust control measures.
- Re-vegetation of cleared areas (seeding/planting).

Neustadt Community Expansion Project Virtual Open House

Aquatic Resources

Enbridge understands the importance of protecting watercourses, wetlands, and associated wildlife during construction and therefore will implement recognized mitigation measures to reduce possible environmental effects.

Potential Effects

- Disruption and alteration to aquatic species and habitat and/or nuisance effects.
- Increased erosion, sedimentation, and turbidity resulting from removal of vegetation.

Example Mitigation Measures

- Adhere to the existing Enbridge agreement with the DFO.
- Install erosion and sediment control measures.
- Obtain all agency permits and approvals.
- Conform to fish timing window guidelines.
- Horizontal Directional Drill and/or trenchless drill within or near environmentally sensitive features (i.e., watercourses, wetlands etc.)
- For in-channel construction, protect aquatic species through methods such as flow diversion/dewatering, fish rescue planning etc., and manage sedimentation and turbidity.
- Restore and seed disturbed areas to establish habitat and reduce erosion, if necessary.
- Replant vegetation along waterways.

Neustadt Community Expansion Project

Virtual Open House

Terrestrial Resources

During construction, natural environmental features such as wildlife habitat and vegetated/wooded areas will need to be crossed.

Potential Effects

- Damage or removal of vegetation and wildlife habitat in the construction area.
- Disturbance and/or mortality to local wildlife.

Example Mitigation Measures

- Conduct surveys (including Species at Risk surveys) in advance of construction to determine opportunities for wildlife habitat to exist.
- Complete tree removal outside of migratory bird windows (typically from April 1 – August 31), to the extent possible.
- Clearly mark the construction area to avoid accidental damage.
- Restore and seed disturbed areas to establish habitat and reduce erosion, if required.
- Secure any necessary permits and follow any conditions of approval.

Neustadt Community Expansion Project Virtual Open House

Cultural Heritage Resources

During construction, cultural heritage features such as archaeological finds, buildings, fences, and landscapes may be encountered. Detailed field surveys will be conducted by independent, third-party archaeologists and cultural heritage professionals prior to construction, if required.

Potential Effects

- Damage or destruction of archaeological or historical resources.

Example Mitigation Measures

- Archaeological assessment of the construction footprint, with review and acceptance from the Ministry of Citizenship and Multiculturalism (MCM).
- Cultural heritage assessment (for built heritage features and cultural heritage landscapes) of the construction right-of-way, with review and comment from MCM.
- Reporting of any previously unknown archaeological or historical resources uncovered or suspected of being uncovered, during excavation.

Neustadt Community Expansion Project

Virtual Open House

Pipeline Design

The high-grade polyethylene pipeline is designed to meet and/or exceed the regulations of the Canadian Standards Association (Z662 Oil and Gas Pipeline Systems) and the applicable regulations of the Technical Standards & Safety Association (TSSA).

Pipeline Safety and Integrity

Enbridge takes many steps to ensure safe, reliable operation of our network of natural gas pipelines, such as:

- Design, construct, and test our pipelines to meet or exceed requirements set by industry standards and regulatory authorities,
- Continuously monitor the entire network, and
- Perform regular field surveys to detect leaks and confirm corrosion prevention methods are working as intended.

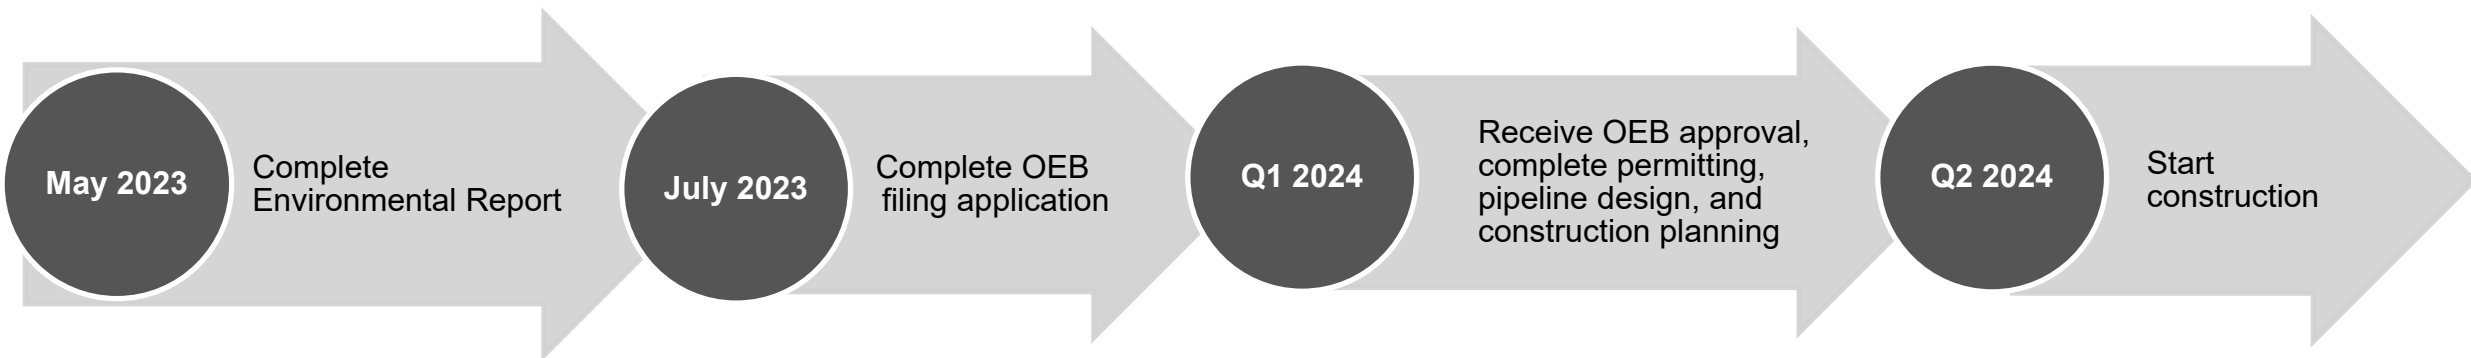

Neustadt Community Expansion Project Virtual Open House

Next Steps

After this Virtual Open House, Enbridge intends to pursue the following schedule of activities:

Neustadt Community Expansion Project Virtual Open House

Thank You!

On behalf of the Project team, thank you for listening to the Virtual Open House presentation. Please complete a Questionnaire (located in the Resources Tab) by **April 12, 2023**, for your comments to be considered as part of the Environmental Report.
