Enbridge Gas Receives Ontario Energy Board Approval for Rate Changes Effective Oct. 1, 2022

Enbridge Gas recently received approval from the Ontario Energy Board (OEB) for rate changes effective Oct. 1, 2022 (EB-2022-0219). These changes were proposed to the OEB earlier this month as part of the Quarterly Rate Adjustment Mechanism (QRAM) and approved as filed.

QRAM is the mechanism Enbridge Gas uses to review and adjust our rates for changes in natural gas prices. This is done every three months to reflect ongoing changes in the market price of natural gas and to adjust for the difference between the forecasted price of natural gas and actual price from prior periods.

The continuing Russian conflict paired with strong domestic demand and increased global demand for U.S. liquefied natural gas (LNG) exports has resulted in historically high natural gas market prices, which are anticipated to continue for some time.

We understand that energy affordability is a priority for Ontario families and businesses. With the OEB's approval, from October 2021 to September 2022 Enbridge Gas took steps to reduce the impact of rising market prices on customers. We will continue to gradually recover the smoothed-out costs over the coming months. While we see another increase in prices, the magnitude of the increase is proportionally smaller than increases in the past year.

General Service [Rate 6](#) will also be changing effective Oct. 1, 2022. Customers can find current information on these rates on our website or in the notice included with their October bill.

Changes to Rate Notices

Beginning October 2022, printed and electronic rate inserts will no longer be included with large volume customer bills. Customers will continue to receive bill messaging whenever there is a rate change, and in place of printed rate notices, our website will contain the most up-to-date rate information.

Details on Enbridge Gas' rates are available online and updated quarterly at enbridgegas.com/customercontracts.

Force Majeure and Interruption Notification System Testing

In October, Enbridge Gas will be completing tests of both its force majeure and interruption notification systems.

During these tests, customers will be contacted and are asked to “reply” upon receipt.

In the event of an actual force majeure, customers are required to immediately cease consumption of natural gas upon receipt of the force majeure notification.

Keep contact information up to date

It is important that Enbridge Gas has up-to-date contact information in case of curtailment to contract distribution service. In the event of a contract service interruption or force majeure, Enbridge Gas will contact customers using the information we have on file.
