Enbridge Gas Service Activation Tag

Enbridge Gas is committed to providing safe, efficient, and reliable delivery of natural gas to facilitate your building process and day-to-day operations. As the distributor, we are regulated by the Technical Standards & Safety Authority (TSSA) and must comply with the Technical Standards & Safety Act, 2000 and the regulations issued under this act.

Ontario regulation 212/01 (Gaseous Fuels), requires that all premises, where natural gas is being connected for the first time, be inspected by the distributor to ensure that the installation of the appliances meet the requirements within the regulation before being put into use. No person is allowed to activate and put an appliance into use in the premises until the distributor has inspected and verified that the appliance and installation are safe for use. In addition, this inspection is to include all appliances installed, or intended to be installed, prior to occupancy.

Regulation 212/01. Section 7 – Initial putting into use

- 7. (1) Where premises are connected to a supply of gas for the first time, no person shall put an appliance in the premises into use for the first time until the distributor has examined the installation of the appliance and is satisfied that the installation and use of the appliance are in compliance with this Regulation. O. Reg. 212/01, s. 7 (1).
 - (2) An examination under subsection (1) shall include an examination of all appliances intended to be installed at the time of occupation of the premises. O. Reg. 212/01, s. 7 (2).

When construction heat is requested, gas is available to perform setup, adjustment and commissioning of the appliance by the TSSA Certificate Holder prior to the initial putting into use inspection. The Appliance Installer Validation form is required for each gas appliance in the home and completed accordingly.

Effective Jan. 1, 2016, Enbridge Gas will provide every new service installation with a service activation tag; that outlines and summarizes this important regulatory requirement. This tag provides additional written communication that new natural gas services, including the meter, are **not** to be activated by third parties.

Service activation tag

SERVICE ACTIVATION TAG

Tampering with this natural gas service could create a hazardous situation

ONLY an authorized Enbridge Gas representative can safely activate the gas meter, appliance(s) and/ or piping as per Ontario Regulation.
