Dear <<Name>>

**Reference: Notice of Study Commencement - Enbridge Gas Distribution Inc.
Proposed Pipeline to Serve the Community of Fenelon Falls, Ontario**

Enbridge Gas Distribution Inc. (Enbridge) may apply to the Ontario Energy Board (OEB) for approval to construct a natural gas pipeline in the City of Kawartha Lakes to service the community of Fenelon Falls. The proposed pipeline (approximately 28 kilometers in length) will originate in the community of Lindsay at approximately the intersection of Highway 35 and Highway 7 and terminate at Francis Street East in Fenelon Falls. The proposed pipeline will cross the Trent Severn Waterway in Fenelon Falls, and will be a combination of Nominal Pipe Size (NPS) 8 (8 inch diameter; 203 mm) and NPS 6 (6 inch diameter; 152 mm) high pressure (HP) and extra high pressure (XHP) natural gas lines.

Stantec has been retained by Enbridge to perform an Environmental Assessment of the proposed work, as well as prepare an Environmental Report documenting all findings and recommended mitigation measures. The study is being conducted in accordance with the OEB's "Environmental Guidelines for the Location, Construction and Operation of Hydrocarbon Pipelines and Facilities in Ontario, Sixth Edition (2011)", and Section 18 of the *Canadian Environmental Assessment Act* Screening Criteria (if applicable).

Pending the results of the study, Enbridge may file a Leave-to-Construct application for this pipeline with the OEB in accordance with the requirements of the above noted guidelines.

Information regarding the project will be presented in the upcoming Public Information Session, scheduled for January 20, 2014, from 5 to 8 p.m. in the Fenelon Falls Community Centre, 27 Veterans Way, Fenelon Falls, Ontario.

At this time, we invite you to provide or coordinate comments and/or concerns on behalf of your respective agency to assist us in the preparation of the Environmental Report. Information regarding other proposed developments in the area of the proposed pipeline is also requested to assist us in the assessment of cumulative effects.
