RE: Enbridge Gas Distribution Incorporated
Scugog Island Pipeline Project
Township of Scugog, Ontario
Notice of Project

Dear [Insert FN Contact]:

Enbridge Gas Distribution Incorporated (Enbridge) has retained Dillon Consulting Limited (Dillon) to undertake an environmental and cumulative effects assessment and route selection study for approximately 7 kilometers (km) of natural gas pipeline required to provide Scugog Island with natural gas for the first time. The study is being conducted in accordance with the Ontario Energy Board's (OEB) Environmental Guidelines for the Location, Construction, and Operation of Hydrocarbon Pipelines and Facilities in Ontario, 7th Edition, August 2016. Once the study is complete, Enbridge may apply to the OEB for approval to construct the new pipeline. If approved, construction may be scheduled for the spring of 2019.

A Preliminary Preferred Route (PPR) for the proposed natural gas pipeline has been identified. The PPR is proposed to start just west of the intersection of Highway 57 and Highway 7A in Blackstock, head west along Highway 7A, and terminate near the intersection of Highway 7A and Island Road in Port Perry. Approximately 7 km of Nominal Pipe Size (NPS) 4-inch extra high pressure (XHP) steel pipe will be installed along Highway 7A.

An alternative route is also being considered as part of the study. It comprises two separate pipeline segments; one segment along Scugog Line 14 between Lake Ridge Road and Marsh Hill Road; and one segment along Scugog Line 6/Highway 7A between Highway 7/12 and Island Road. The alternative would require approximately 2.9 km of NPS 8-inch XHP steel pipe along Scugog Line 14; and 2.7 km of NPS 6-inch XHP steel pipe and 3.3 km of NPS 4-inch XHP steel pipe along Scugog Line 6/Highway 7A for a total length of 8.9 km.

Both the PPR and the alternative route require short tie-ins to the existing network at road intersections and the pipeline is planned to be located mainly within the municipal road rights-of-way. A map showing the Study Area and pipeline routes is enclosed.

In order to undertake a successful consultation program, Indigenous engagement will play a key role in the Project. Enbridge will be hosting two Open House meetings as part of the study. As noted in the attached Notices of Study Commencement, Enbridge is hosting a Public Open House at Mississaugas of Scugog Island First Nation Administration Hall (22521 Island Road, Port Perry) on July 25, 2017, between 5 PM and 8 PM, and at the Scugog Island Hall (2710 Demara Road, Port Perry) on July 26, 2017, between 5 PM and 8 PM.

As part of the initial phase of the study, we are collecting information on the archaeological environment, natural environment and socio-economic features within each route as described above. Examples of data being collected include information on terrestrial and aquatic vegetation and wildlife, archaeological and heritage resources, community parks and picnic areas, community facilities, nature trails, bus routes and other utilities such as water, sewage, industrial and commercial utilities. Planning policies and future plans for the study area are important pieces of information that will be considered when evaluating potential routes.

Enbridge is committed to meaningful engagement with Indigenous groups and the satisfaction of the duty to consult. Enbridge looks forward to engaging with your Nation to ensure your community's interests are being represented. [insert First Nation] is invited to provide comments regarding the proposed project. Specifically, Enbridge is seeking information about any potential impacts that the project may have on constitutionally protected Aboriginal or treaty rights and any measures for mitigating those adverse impacts.

We invite your community to be involved in the engagement and consultation process. Kindly indicate whether your community is interested in participating in the engagement activities on or before July 17, 2017. If you are unable to respond by the above date and are intending to do so, please provide an alternative date for when the Project Team may expect a response.

Enbridge would also be interested in meeting with [insert First Nation] to share project related information should you wish. Alternatively, please advise if you do not wish to meet individually but would prefer to be kept informed of the project.

On behalf of the Project Team, thank you in advance for your consideration regarding the initial phases of the project. Please do not hesitate to contact me with any questions you may have.
