

NOTICE OF STUDY COMMENCEMENT AND INFORMATION SESSION PROPOSED PIPELINE TO SERVE THE SEATON LAND DEVELOPMENT

ENBRIDGE GAS DISTRIBUTION INC.

Enbridge Gas Distribution Inc. ("Enbridge") is proposing to construct up to 4 kilometres (km) of Nominal Pipe Size (NPS) 8-inch steel high pressure (HP) and NPS 6-inch steel extra high pressure (XHP) natural gas pipeline in North Pickering, Ontario, to serve the Seaton Land Development. The proposed pipeline will originate from Enbridge's existing NPS 16-inch steel XHP pipeline running north-south along Sideline 16 and will terminate at the intersection of Sideline 24 and Taunton Road. The general location and study area of the proposed pipeline is identified on the adjacent map.

As part of the planning process, Enbridge has retained Stantec Consulting Ltd. ("Stantec") to undertake an environmental study of the construction and operation of the natural gas pipeline (the "Environmental Study"). The Environmental Study will fulfill the requirements of the Ontario Energy Board's (OEB's) "Environmental Guidelines for the Location, Construction and Operation of Hydrocarbon Pipelines and Facilities in Ontario, Sixth Edition (2011)".

The Environmental Study process will include consultation and engagement with landowners, Aboriginal communities, government agencies and other interested persons. Public consultation is an integral component of the Environmental Study. An Information Session regarding the proposed project will be held as follows:

Wednesday, December 2, 2015
5:00 p.m. to 8:00 p.m.
Whitevale Community Centre
405 Whitevale Road
Whitevale, ON L0H 1M0

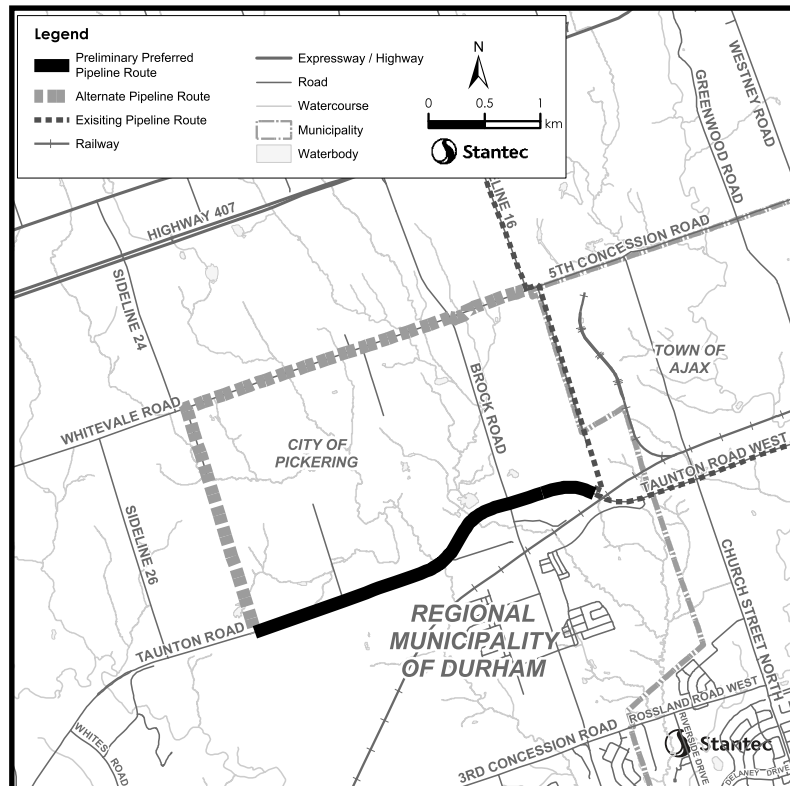

The Information Session will be conducted as drop-in style, and representatives from Enbridge and Stantec will be available to discuss the proposed project and answer questions regarding the route, design and schedule. Input received will be used to confirm both the existing environmental conditions and the preferred pipeline route and to develop site specific protection or mitigation measures for the project.

It is anticipated that an Environmental Report for the study will be completed in January 2016, after which Enbridge will file an application for the proposed pipeline to the OEB. The OEB's review and approval is required before construction of the project can proceed. If approved, construction of the pipeline is currently anticipated to begin no earlier than the summer of 2016.

For any questions or comments regarding the Environmental Study or this project please do not hesitate to contact the following:
