

ENBRIDGE GAS DISTRIBUTION INC. RESPONSE TO
FEDERATION OF RENTAL-HOUSING PROVIDERS OF ONTARIO
INTERROGATORY #18

INTERROGATORY

REF: EB-2012-0451 EX. A, Tab 3 Schedule 3, page 20 and 21, paragraph 37

Preamble: We are presuming that the system modelling referred to in paragraph 37 is EGD system modelling.

18. Please provide the most recent results from modelling done for the Eastern Canadian Mutual Assistance Program for an outage at Parkway station.
 - a. If there is any more recent simulations done in conjunction with pipelines and utilities for the purposes of emergency planning, please provide those results and any reports created
 - b. Please provide the results of any simulations performed in conjunction with TCPL and EGD as a result of the coordinated efforts to bring the applications in this proceeding in front of the Board.

RESPONSE

- (a) The system modeling referred to in paragraph 37 is Enbridge system modeling. Enbridge has not conducted recent simulations under the Eastern Canadian Mutual Assistance Program. Gas Control staff from several Eastern Canadian and US LDC's and pipelines meet annually to discuss operations and occasionally conduct emergency planning exercises. These exercises are used for training purposes and to familiarize gas control staff across the regions;-written reports from these roundtables are not created.
- (b) Enbridge has not performed simulations in conjunction with TCPL related to an outage at Parkway Station. Enbridge simulations were based on loss of flow from Parkway into the Enbridge system.

Witnesses: M. Giridhar
