

ENBRIDGE GAS DISTRIBUTION INC. RESPONSE TO
ENVIRONMENTAL DEFENCE INTERROGATORY #46

INTERROGATORY

Issue A.3 “Are the costs of the facilities and rate impacts to customers appropriate?”

Reference: Ex. A, Tab 3, Schedule 9, Attachment 3

Please reproduce this exhibit with the following new assumptions:

- a) The addition of in-franchise customer additions (146,337) in the GTA Project Influence Area between 2015 and 2024 is accompanied by no net growth in total annual throughput volumes or peak demand in the GTA Project Influence Area. That is, Enbridge’s net incremental “Total Distribution Revenues” is equal to the incremental fixed monthly customer charge revenues associated with the incremental customers; and
- b) The time horizon for calculating the “Total Transportation Savings” and “Total Transportation Services Charge” revenues is limited to the 2015 to 2024 time period.

RESPONSE

- a) The economic feasibility assumes costs, average use and distribution revenue rates are held constant in current year terms over the 40 year horizon.
- b) Please see response to Environmental Defence Interrogatory #44 found at Exhibit I.A.3.EGD (Update).ED.44.

Witness: S. Murray
