

OSEA INTERROGATORY #1

INTERROGATORY

Reference: Exhibit B, Tab 1, Schedule 2, Annual Resource Savings

Please provide a column summarizing the cap and trade implications for each measure, including but not limited to the carbon dioxide equivalent of the natural gas savings and associated minimum cost of compliance assuming the auction floor price (monetary savings that can be achieved through implementation of measure). Please provide calculations and assumptions.

RESPONSE

Union:

The customer related carbon dioxide emission conversion factor is 0.001875 tonnes CO₂e/m³ as filed in Union's 2017 Cap-and-Trade Compliance Plan (EB-2016-0296) at Exhibit 2, Schedule 1, Updated 2017-01-18.

The Calculation of 2017 Estimated Ontario Minimum Auction Price, filed in Union's 2017 Cap-and-Trade Compliance Plan at Exhibit 2, Schedule 2, p.2 is \$17.70.

Enbridge:

The customer related carbon dioxide emission conversion factor is 0.001875 tonnes CO₂e/m³ as filed in Enbridge's 2017 Cap and Trade Compliance Plan (EB-2016-0300) at Exhibit B, Tab 3, Schedule 1, p.5, Table 5, Updated 2017-02-23.

The calculation of the 2017 forecasted Ontario Auction Reserve Price, filed in Enbridge's 2017 Cap and Trade Compliance Plan (EB-2016-0300) at Exhibit B, Tab 4, Schedule , p.7, Table 3 is \$17.70.
