

SEC INTERROGATORY #77

INTERROGATORY

[B/6/1, p. 23] Please advise whether the expert agrees with the statement “assessing net savings is particularly important for custom programs because it is common to pay for projects that would have happened otherwise”. Please explain why.

RESPONSE

The Navigant team agrees that assessing net savings is important for all measure and program types, including custom programs. The Navigant team do not necessarily agree that paying for custom projects that would happen otherwise is “common”, as the frequency of occurrence depends on multiple factors, such as program design and eligibility requirements.
