

## LAND USE REQUIREMENTS

### Land Use – General

1. Land use requirements for wells TL9/TL9H (the “Project”) will require the following features be constructed:
  - A temporary gravel pad approximately 75m x 90m with a fence around the perimeter in order to complete the drilling of the wells. Once the drilling of well TL9H is complete, the gravel pad will be reduced to approximately 11m x 5.5m; and
  - A 6m wide permanent gravel lane will be constructed off of the existing gravel lane in order to allow access to the well site once the well is completed as a horizontal well.

### Land Use – TL 9 Stratigraphic Test Well

2. Exhibit B, Tab 1, Schedule 1, Attachment 3 shows the features to be constructed for the stratigraphic test well, TL9. Exhibit C, Tab 1, Schedule 1, Attachment 1, Appendix A shows the environmental and social-economic features that occur within the study area for the Project.
3. Attachment 1 to this Exhibit sets out the Affidavit of Title Search.

### Negotiations to Date

4. Enbridge Gas is currently in negotiations to purchase the land required for the Project. The lands acquired will also contain the existing Enbridge Gas facilities in the Ladysmith Designated Storage Area (“DSA”). Once the lands are acquired

Enbridge Gas will license the lands back to the current property owner, Kimcor Farms Ltd. ("Kimcor").

5. Enbridge Gas has received authorization to construct the well pad and the well from Kimcor. This authorization is set out at Attachment 2 to this Exhibit. Enbridge Gas expects to have the lands required for the Project acquired by the end of June 2019.
6. Enbridge Gas is not aware of any unresolved land matters.
