

# NOTICE OF A HEARING

## Enbridge Gas Inc. has applied for approval a new multi-year natural gas conservation plan

Enbridge Gas Inc. is asking the Ontario Energy Board for approval of a new natural gas demand side management (conservation) plan, effective **January 1, 2027**, and the conservation programs that would be offered to customers under the plan in the years 2027 to 2030.

Enbridge Gas Inc. is asking the Ontario Energy Board to approve a natural gas demand side management plan budget of \$191 million which escalates over the 4-year term to \$227 million in 2030. Currently, Enbridge Gas Inc. is implementing a natural gas conservation plan with a 2026 budget of \$200 million. Enbridge Gas has also requested that the Ontario Energy Board determine, at the outset of the process, if the scope of its review will include consideration of the cost of carbon.

The proposed conservation plan consists of programming for residential, income qualified, commercial, industrial, and large volume customers.

If the application is approved as filed, a typical residential customer in each of the rate zones shown below will pay the following monthly amounts for natural gas conservation programs in 2027. A comparison to the current monthly amounts a typical residential customer is paying for 2026 natural gas conservation programming is also shown.

Rate Zone	Average Monthly Natural Gas Conservation Costs		
	Current 2026	Proposed 2027	Proposed 2030
EGD Rate Zone (Rate 1)	\$2.90	\$2.43	\$2.80
Union South Rate Zone (Rate M1)	\$2.87	\$2.29	\$2.61
Union North Rate Zone (Rate 01)	\$2.87	\$2.29	\$2.61

Other customers, including businesses, will also be affected. It's important to review the application carefully to determine whether you may be affected by the proposed changes.
