

ENBRIDGE GAS INC.
Answer to Interrogatory from
School Energy Coalition (SEC)

Reference: B1/2/1, p. 16

Question:

Please explain how there can be 2019 spend in 2014-2018 capital pass-through projects, which by definition should be completed and in-service no later than the end of 2018.

Response

There are often carry-over costs that occur after a project goes into service. Examples of these costs include activities such as construction clean up, restoration, baseline integrity inspections, painting, installation of anodes and other.
