

ENBRIDGE GAS INC.  
Answer to Interrogatory from  
Consumers Council of Canada (CCC)

Reference: Ex B1/T2/S1/p. 2

Question:

The evidence states that, “As there are finite resources to complete capital projects, projects are selected for the AMP on the basis of their relative priority. All projects are evaluated and prioritized/optimized to ensure that capital resources are employed to address the highest priority items across all asset categories.” Please explain if this comment pertains to planning with respect to the two rate zones individually or to the consolidated Company. When does EGI intend to undertake capital planning across the Company as a whole?

---

**Response**

The comment pertaining to planning is relevant to the EGD and Union rate zones. Conversely each AMP was created individually with unique prioritization/optimization methodology. The following excerpt highlights the common considerations included in both planning methodologies:

“Enbridge Gas’s methodology for project prioritization/optimization considers risk, customer input and preferences, resource availability and asset portfolio strategies.”<sup>1</sup>

As per the response at Exhibit I.STAFF.34, Enbridge Gas is still assessing its future asset management processes.
