

SEC INTERROGATORY #2

INTERROGATORY

[C1-2-1, App C]

With respect to the cap and trade impact on 2018 volume forecast, please provide the specific 2018 cap and trade charges that Enbridge used to model the impact on the volume forecast.

RESPONSE

Cap and Trade charges of 3.35 cents / m³ in 2017, and 3.59 cents/m³ in 2018 were used to model the impact of Cap and Trade on the volume forecast. The 2018 forecast was produced assuming the auction reserve price will increase by 5% plus inflation over 2017 as stated in 'Implementation of Ontario's cap and trade program and the regulator's role' by the OEB, on July 21, 2016; slide #17.
