

ENBRIDGE GAS INC.
Answer to Interrogatory from
Building Owners and Managers Association of Greater Toronto (BOMA)

Reference: General Definition of Mains

Question:

Please provide a definition of EGD's mains. What criteria are utilized, for example, pressure, diameter pipe, function or purpose, length, or other factors. Please specify what other factors come into play.

Response

The EGD rate zone's mains are described as *"the connection between the entry of natural gas into EGD's system and the delivery of gas to where energy is used by customers."* This definition can be found at section 5.2, page 105, in the EGD rate zone's AMP which is filed at Exhibit C1, Tab 2, Schedule 1.

Mains are categorized by material, namely Steel and Plastic. Steel Mains are further divided into Integrity and Steel Mains.

The definition of these assets can be found at section 5.2 in the EGD rate zone's AMP which is filed at Exhibit C1, Tab 2, Schedule 1. Please refer to sub-section 5.2.4, page 113 for Integrity Mains, sub-section 5.2.5, page 116 for Distribution Steel Mains and sub-section 5.2.6 page 131 for Distribution Plastic Mains.
