

Renewable Natural Gas (RNG) Supply Declaration Form (“Declaration”)

This form is used by Enbridge Gas Inc. (“EGI”) to confirm the type of gas the Shipper (“Shipper”) identified below will supply. By confirming the type of supply, the Shipper will receive an electronic label in Enerline. The purpose of this electronic label is to provide tracking and reporting information for Shipper’s RNG within Enerline.

For the purposes of this Declaration, Renewable Natural Gas (“RNG”) means a substance that is derived entirely from biological matter available on a renewable or recurring basis and that is primarily methane*.

Shipper legal name:

Account number:

Mailing address (Corporate office):

Shipper type:

Marketer Producer Utility Power End use Other

If “Other”, please specify:

Additional information (optional)

Feedstock:

Landfill Wastewater Animal manure Food waste Other

If “other” please specify:

It is the Shipper’s responsibility to notify EGI of any changes to the information provided above.

I confirm that the gas being delivered set out in the table above is RNG as defined above.

Print name and title:

Authorized producer signatory:

DISCLAIMER – The RNG label provided in Enerline does not serve as verification that the declared gas conforms to the definitions of such gases as provided in various programs, but rather serves as a tracking and reporting aid for EGI. Due diligence for transactions to verify gas as RNG is still required between the Shipper and buyer. This Declaration may be discontinued, replaced or modified at any time as EGI continues to review and improve its renewable programs and offerings.

*This definition is the same as the definition for “Biomethane” under the *Greenhouse Gas Pollution Pricing Act*, S.C.2018 (GGPPA)
