Enerline Multi-Factor Authentication (MFA)

Setting up Okta Verify

Before setting up your Enerline MFA profile:

An MFA application external to Enerline is required to be downloaded to your mobile device or desktop computer BEFORE implementing the steps below to set up your Enerline MFA profile. Please consult with your company's information systems team on which multi-factor authentication application is approved for your use.

1. Enter credentials on the Enerline login screen.	Carrent Environment: Dev Utername ed.fr/: @remoter use use Passod Utername @Sign for Carrent Dev Dev Sign for Encent catacounced Not sure it you'rs an Encelline coatomert?	Constitution
2. Click Setup for the Okta Verify authentication option. Setup Okta	Verify	
Select your device type		
() iPhone		
O Android		
Back to factor list		

4. After selecting either iPhone or Android, additional instructions appear to download Okta Verify to your mobile device (if not previously done) and begin the account set-up steps.

Click the **Next** button.

5. As part of setting up your authentication account in Okta Verify on your mobile device, you will be prompted to scan the image/QR code provided. Carry out the set up steps in the authentication application until complete. You will see a six-digit code that changes periodically. This code will be used to authenticate your identity when logging in to Enerline going forward.

Click the **Next** button.

Note: If you cannot scan the image/QR code, click on the 'Can't Scan?' link located below the image/QR code. This will open a new window containing an alpha/numeric code. See further instructions in 5a.

5a. The screen shot is for Enerline users who can't scan the image/QR code:

You will need to insert this alpha/numeric code into the Okta Verify application. (To copy and paste the code, double click on the code to highlight it and then use Ctrl + c to copy; to paste, use Ctrl + v.)

Click the **Next** button.

kta Verify on

6. The six-digit code provided in Okta Verify is to be entered into the 'Enter Code' field. Click **Verify**. This will allow you to resume Enerline activity.

You have now set up a security option to authenticate your identity when logging in to Enerline. Refer to the Okta Verify application for a new six-digit code each time you log in to Enerline.
