October 2018

# Natural Gas Rates Have Changed

For **Commercial and Industrial Customers** who purchase their gas supply from a **Gas Marketer**

**Rate 6**

The Ontario Energy Board (“OEB”) has approved changes to Enbridge Gas Distribution’s rates effective **October 1, 2018**.

The chart on the back provides a breakdown of the annualized changes. The total effect on your bill will depend on how much gas you use and the terms of your gas marketer agreement.

## **Gas Supply Charge**

The price you pay for the natural gas you use, shown as the Gas Supply Charge on your bill, depends on the terms of your gas marketer agreement.

## **Transportation to Enbridge**

### **If your transportation service is provided by Enbridge**

A ‘Transportation to Enbridge’ charge will appear in the top Enbridge section of your gas charges.

If Enbridge provides transportation service from Western Canada and the United States to our distribution system in Ontario, the rate effective October 1, 2018 is 4.9407 ¢/m<sup>3</sup> and results in an increase of about \$42.54 per year for a typical customer due to higher costs for transporting natural gas to Ontario.

If Enbridge provides transportation service from the Dawn market hub in southwestern Ontario to our distribution system, the rate remains at 1.0404 ¢/m<sup>3</sup> and results in no change for a typical customer. In this case, your marketer either provides transportation service for your gas supply to the Dawn market hub or purchases gas supply at the Dawn market hub. The rate you pay for transportation and/or gas supply from your marketer is based on the terms of your gas marketer agreement and these charges will appear in the marketer section of your gas charges.

### **If your transportation service is provided by your marketer**

Your ‘Transportation to Enbridge’ charge will appear with your marketer charges on your bill. The rate you pay for transportation is based on the terms of your gas marketer agreement.

## **Delivery to You**

The Delivery charge has increased by approximately \$38.14 per year for a typical customer due to higher delivery related costs. Due to the cancellation of the cap and trade program, effective October 1, 2018, cap and trade costs will be removed from the Delivery to You charge on your bill. This results in a decrease of about \$757.71 per year for a typical customer.

Enbridge has tracked all costs related to cap and trade. On an interim basis, the OEB has approved a Cap and Trade Clearance refund of 0.3010 ¢/m<sup>3</sup> to reflect the difference between the amount customers paid and our actual costs. This results in a credit of about \$4.95 and will be included in the Delivery to You on your October bill. To learn more, visit [enbridgegas.com/capandtrade](http://enbridgegas.com/capandtrade).

## **Cost Adjustment**

The current cost adjustment includes a charge of 0.6417 ¢/m<sup>3</sup> for Delivery and a refund of 0.0462 ¢/m<sup>3</sup> for Transportation. This cost adjustment is in effect until September 30, 2019.

## **Rate Adjustment**

The OEB has also previously approved a Rate Adjustment to reflect the difference between the forecast costs for energy conservation programs from 2015 and the actual costs. For a typical commercial customer, this adjustment will be a charge of about \$2.24, which will appear on their October bill.

## **Commercial and Industrial Rates**

Charges for gas used from October 1, 2018 will be calculated using the new approved rates as shown on the reverse. The annualized impact is based on a typical commercial and industrial heating and water heating customer who uses 22,606 cubic metres (m<sup>3</sup>) per year.
