October 2018

Natural Gas Rates Have Changed

For **Commercial and Industrial Customers** who purchase their gas supply from **Enbridge Gas Distribution**

Rate 6

The Ontario Energy Board (“OEB”) has approved changes to Enbridge Gas Distribution’s rates effective **October 1, 2018**. A typical commercial and industrial heating customer will see an annual decrease on their bill of about 4.5% as a result of these changes.

The decrease is due to the cancellation of the Ontario government’s cap and trade program, offset by an increase to the Cost Adjustment, higher natural gas prices in North America and higher transportation costs. The chart on the back provides a breakdown of the annualized changes. The total effect on your bill will depend on how much gas you use.

The Gas Supply and Transportation to Enbridge charges are based on North American market prices and established transportation prices. We pass these costs on to customers with no mark-up.

The Customer and Delivery charges recover fixed costs for infrastructure and customer service, as well as a regulated rate of return. As of October 1, 2018, costs associated with the cap and trade program have been removed from the Delivery to You charge.

Gas Supply Charge

The Gas Supply Charge has increased from 9.4665 cents per cubic metre (“¢/m³”) to 10.0713 ¢/m³. The Gas Supply component of the Cost Adjustment is currently a charge of 0.3811 ¢/m³. This charge, combined with the Gas Supply Charge, results in a new total effective Gas Supply rate of 10.4524 ¢/m³.

Transportation to Enbridge

The Transportation charge has increased by approximately \$42.54 per year for a typical customer due to higher costs for transporting natural gas to Ontario.

Delivery to You

The Delivery charge has increased by approximately \$38.14 per year for a typical customer due to higher delivery related costs. Due to the cancellation of the cap and trade program, effective October 1, 2018, cap and trade costs will be removed from the Delivery to You charge on your bill. This results in a decrease of about \$757.71 per year for a typical customer.

Enbridge has tracked all costs related to cap and trade. On an interim basis, the OEB has approved a Cap and Trade Clearance refund of 0.3010 ¢/m³ to reflect the difference between the amount customers paid and our actual costs. This results in a credit of about \$4.95 and will be included in the Delivery to You on your October bill. To learn more, visit enbridgegas.com/capandtrade.

Cost Adjustment

The total Cost Adjustment charge is 0.9766 ¢/m³, effective until September 30, 2019. Please see the chart on the reverse for the breakdown by component.

Rate Adjustment

The OEB has also previously approved a Rate Adjustment to reflect the difference between the forecast costs for energy conservation programs from 2015 and the actual costs. For a typical commercial customer, this adjustment will be a charge of about \$2.24, which will appear on their October bill.
