April 2019

Natural Gas Rates Have Changed

For **Commercial and Industrial Customers** who purchase their gas supply from **Enbridge Gas**

Rate 6

The Ontario Energy Board (“OEB”) has approved changes to Enbridge Gas’ rates effective **April 1, 2019**. A typical commercial and industrial heating customer will see an annual decrease on their bill of about 7.5% as a result of these changes.

The decrease is primarily due to lower natural gas prices in North America. The chart on the back provides a breakdown of the annualized changes. The total effect on your bill will depend on how much gas you use.

The Gas Supply and Transportation to Enbridge charges are based on North American market prices and established transportation prices. We pass these costs on to customers with no mark-up.

The Customer and Delivery charges recover fixed costs for infrastructure and customer service, as well as a regulated rate of return.

Gas Supply Charge

The Gas Supply Charge has decreased from 12.4577 cents per cubic metre (“¢/m³”) to 10.7122 ¢/m³. The Gas Supply component of the Cost Adjustment is currently a charge of 1.2169 ¢/m³. This charge, combined with the Gas Supply Charge, results in a new total effective Gas Supply rate of 11.9291 ¢/m³.

Transportation to Enbridge

The Transportation charge has decreased by approximately \$31.10 per year for a typical customer due to lower costs for transporting natural gas to Ontario.

Delivery to You

The Delivery charge has decreased by approximately \$68.49 per year for a typical customer due to lower delivery related costs.

Cost Adjustment

The total Cost Adjustment charge is 1.4873 ¢/m³, effective until March 31, 2020. Please see the chart on the reverse for the breakdown by component.
