

Community update

Bobcaygeon Community Expansion Project

Summer 2025

Welcome to the Enbridge Gas Bobcaygeon Community Expansion Project update! You are receiving this update because you live in the area where ongoing project activities are occurring.

Ongoing construction

Things are moving along as we progress. Enbridge Gas expects some of the project to be in-service this winter. Mainly Centreline Rd. (County Rd. 10) and Pigeon Lake Rd. as well a number of business and residences on the edge of Bobcaygeon along County Rd. 36.

Did you know?

Bobcaygeon Community Expansion Project consists of up to 115 km of natural gas pipeline from Cowan's Bay to Bobcaygeon.

This is a \$115 million project that will promote economic growth in Northern Ontario for years to come.

Construction started summer 2024 and is scheduled to be completed by the end of 2027.

Many employees and contractors are on site to complete the project.

Enbridge Gas has over 175 years of proven safety experience meeting strict standards for projects such as this one.

Shovels in the ground

On Thursday Aug. 29, 2024 Minister Lecce joined executives from Enbridge Gas and local council members at the Bobcaygeon Community Expansion Project site to announce the commencement of construction.

This community has been patient and waiting a long time for this day to happen.

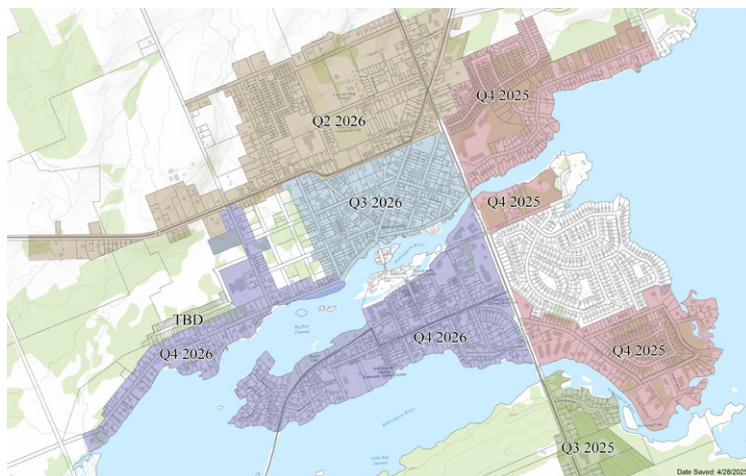

Affordability is on everyone's mind and this will provide the community with options and alternatives.

Beyond affordability, unparalleled reliability to weather any emergency event.

Drop by our storefront in Bobcaygeon located at **71 Bolton St. (rear entrance)** and chat with us to see if a natural gas connection is right for you.

While you're there, don't forget to pick up your **Tim Horton's \$5 gift card** and enjoy a treat on us (while supplies last).

Enbridge Gas Inc. (Enbridge Gas) is providing the diagram above for informational purposes only. The content shown, including potential timelines, is based on information and estimates available to Enbridge Gas at the time of compilation and is subject to change without notice. Enbridge Gas does not guarantee the installation of natural gas services within the identified timeframe or the identified locations. An updated timeline (if available) may be provided if you contact Enbridge Gas to request same.

Enbridge Gas is not liable for any damage, loss, dispute, or dissatisfaction arising from, or in connection with, your use and reliance of this information.

Ontario's Integrated Energy Plan

Ontario's first Integrated Energy Plan is a forward-looking blueprint designed to ensure our province has the energy it needs to power homes and industries today and for decades to come.

This plan prioritizes affordability, reflects the needs of families and acknowledges the real challenges facing businesses, while at the same time, supporting the long-term reliability and security of Ontario's clean energy supply.

Ontario is committed to maintaining and strengthening access to reliable, affordable energy like natural gas, which remains critical to the success of our rural communities along with our farmers and industries. In parallel, the province is creating space for new and emerging energy sources—including low-carbon hydrogen and renewable natural gas that can enhance system flexibility and contribute to emissions reductions over time.

Go to ontario.ca/page/energy-generations for more information.

In the community

At Enbridge Gas, it's more than just the energy we deliver. It's the energy we put in. Enbridge Fueling Futures provides resources and opportunities that energize communities to improve their quality of life for today and tomorrow. We focus our investment in three core areas:

Safe communities: We support local safety initiatives and organizations that help make our communities safer places to live, including the safe community first responder grant program, safety planning and education, and humanitarian aid.

Vibrant communities: We support programs and projects that are inclusive, future thinking and help bring out the best in people. Our investments focus on empowering people to achieve their full potential, building potential in youth, celebrating culture and community and honouring Indigenous peoples and cultures.

Sustainable communities: We support sustainability projects that help improve, grow and nurture our environment. We focus on investments that promote environmental education, habitat conservation and remediation and supporting energy transition.

If you have a community investment opportunity that falls within these core areas, go to enbridge.com/about-us/our-values/corporate-citizenship/apply-for-funding to submit an application for funding consideration.
