

Enbridge Gas Inc.

Notice of Environmental Study Commencement and Information Session

Dawn Parkway System Renewal Project: Kirkwall to Hamilton

Enbridge Gas Inc. (Enbridge Gas) will be conducting an Environmental Study for the Dawn Parkway System Renewal Project. Through its integrity management program, Enbridge Gas identified several proactive measures to maintain capacity, safety, and reliability along the Dawn Parkway Transmission System, ranging from targeted segment replacements to broader line upgrades.

For the Environmental Study, Enbridge Gas is considering installing new 48- inch diameter natural gas pipeline between its existing Kirkwall Valve Site, located northeast of the intersection of Safari Road and Valens Road and the existing Hamilton Valve Site, located east of Highway 6 and north of Carlisle Road. The proposed pipeline location was determined through a route selection process conducted in 2019 and is generally parallel to the three existing Enbridge Gas pipelines, measuring approximately 10.2 km in length. New permanent easements and temporary working space during construction will be required.

Consultation and engagement with Indigenous communities, landowners, government agencies, the local municipality, and other interested persons is an integral component of the Project's planning process. As such, an Information Session will be held:

In-Person Information Session:

Millgrove Community Centre
August 25, 5:00 PM to 8:00 PM
855 Millgrove Side Road
Millgrove, ON L0R 1V0

Virtual Information Session (Online):

August 17 to August 31, 2026
<https://www.solutions.com/Kirkwall-HamiltonES>

A copy of the consultation materials from the In-Person Information Session will be available for viewing on the Enbridge Gas project webpage provided below. A questionnaire will also be available as part of the Information Session, and you will have the opportunity to provide comments or ask questions about the proposed Project. Input received may be used to develop site-specific environmental protection and mitigation measures for the Project. Input and comments about the Project are requested by September 15, 2026.

Enbridge Gas has retained Stantec Consulting Ltd. (Stantec) to reaffirm the findings of the 2019 Kirkwall to Hamilton Environmental Report and prepare an Addendum that will fulfill the requirements of the Ontario Energy Board's (OEB) *Environmental Guidelines for the Location, Construction, and Operation of Hydrocarbon Projects and Facilities in Ontario, 8th Edition (2023)*. It is anticipated that the Addendum to the Environmental Report will be completed in Q1 2027, after which Enbridge Gas plans to file a Leave to Construct application for the Project with the OEB. The OEB's approval is required before construction of the proposed Project can proceed. If approved, construction is anticipated to begin in the spring of 2028.

For any questions, comments, or input regarding the Environmental Study, please contact:
