

Enbridge Gas Inc. Notice of Upcoming Project

Tweed Community Expansion Project

This notice is to inform you of an upcoming proposed Enbridge Gas Inc. (Enbridge Gas) project in the Municipality of Tweed and in the County of Hastings called the Tweed Community Expansion Project (the Project). The purpose of the Project is to provide affordable natural gas to residents, businesses, and industries in the community of Tweed.

The Project will be integrated with the existing Enbridge Gas systems. Proposed locations will be available at a later date. It will tentatively be located within the existing municipal road right-of-way, and may also require permanent easements, temporary working space and lay-down areas during construction.

Enbridge Gas has hired a third-party environmental consultant, Stantec Consulting Ltd. (Stantec), to complete an Environmental Study (the Study) for the Project. The Study will be conducted in accordance with the Ontario Energy Board's (OEB) "Environmental Guidelines for the Location, Construction, and Operation of Hydrocarbon Projects and Facilities in Ontario, 8th Edition (2023)" and will include a consultation program, an impact assessment, and a cumulative effects assessment. The Study will support Enbridge Gas' Leave to Construct (LTC) application to the OEB for approval of the Project.

An Environmental Report based on the Study is scheduled to be completed in 2024, when Enbridge Gas plans to file the LTC application. The OEB's review and approval is required before the proposed project can proceed. If approved, construction could begin in early 2025.

Enbridge Gas is committed to undertaking consultation and engagement with stakeholders and Indigenous communities as an integral component of the planning process. Additional details regarding the Project and how to become involved during the consultation and engagement process will be provided in future correspondence.

Should you have any questions or input regarding potential alternative routes or natural environmental features within the Study Area presented above, please contact the undersigned. Input will be evaluated and may be considered within the route evaluation portion of the Project.

Chris Revak
