Please indicate house line pressure (PSI) needed: <input type="checkbox"/> Residential (4 oz./in ²) <input type="checkbox"/> Other:		Can service line run in a straight line from house to street without obstructions? <input type="checkbox"/> Yes <input type="checkbox"/> No <small>(i.e. septic system, wells, creeks, drain tiles, ponds, trees, invisible fence, sprinkler system, etc.)</small>	

Please attach a site plan with proposed service line and meter locations.

Quantity	E = existing A = adding S = stub	Unit/ suite#	Natural gas fired equipment	BTUs per unit	Subtotal BTUs
			Furnace		
			Standard water heater/tankless water heater		
			Range/oven		
			Dryer		
			Grill		
			Fireplace/logs		
			Garage heater		
			Gas light		
			Other (please indicate type):		
			Generator		
Total BTU					

This application expires 12 months from the date of receipt. By signing this application, the party below represents that the above information is accurate. The information provided in this document, and the accuracy thereof, is critical to determine the size of the gas service line and metering equipment, and path of installation. The customer shall notify Enbridge Gas Ohio of any gas load changes prior to the installation and use of future equipment/appliances to avoid additional fees. I understand that if I do not complete any required upgrades to my gas service line and/or meter and install new or upgraded natural-gas-powered equipment on the premises, I may experience insufficient pressure and an interruption in service. Furthermore, if the addition of new or upgraded equipment results in a loss of pressure or other service issues, I understand that Enbridge Gas Ohio may disconnect my service until the necessary upgrades are completed at my expense.

Enbridge Gas Ohio reserves the right to designate or approve the location of all metering equipment and gas service lines. Enbridge Gas Ohio must approve all proposed metering arrangements. It is the sole responsibility of the property owner to mark or otherwise identify any obstructions as soon as practicable and at the latest prior to construction, including but not limited to all privately owned underground facilities on the property (e.g., sanitary and storm sewers, water lines, electric lines, septic systems, irrigation, invisible fences, geothermal systems, etc.).
