New natural gas rates

The Ontario Energy Board (OEB) has approved changes to the rates Enbridge Gas charges its customers effective **Oct. 1, 2026**.

A typical commercial and industrial customer will see an annual increase of 1.1 percent. The total impact on your bill will depend on how much gas you use.

Delivery to You

The delivery charges that vary with consumption decreased based on our forecast cost of delivering natural gas to your home or business. These charges include a facility carbon charge associated with the operation of Enbridge Gas' facilities to deliver natural gas to you.

Transportation to Enbridge

The transportation charge has decreased by approximately \$15.52 per year for a typical customer due to lower costs for transporting natural gas to Ontario.

Gas Supply Commodity Charge

The gas supply commodity charge has decreased from 10.8019 ¢/m³ to 9.5866 ¢/m³ based on our forecast of natural gas market prices for the next 12 months.

Cost Adjustment

The current adjustment is a refund of 3.2294 ¢/m³. The cost adjustment accounts for the variance between actual and forecast prices from earlier periods. Please see the included chart for the breakdown by component.

Rate Adjustment

This rate change includes an adjustment to reflect the clearance of the 2024 Utility Earnings and Disposition of Deferral and Variance Account (UEDVA) balances. This will appear on customers' October bills as a one-time charge of approximately \$921.06 for a typical customer.

Charges for gas used from Oct. 1, 2026 will be calculated using the new approved rates as shown in the chart. The annualized impact is based on a typical Rate 10 - Union North West customer who uses 93,000 cubic metres (m³) per year.
