### New natural gas rates

The Ontario Energy Board (OEB) has approved changes to the rates Enbridge Gas charges its customers effective **July 1, 2026**.

A typical commercial and industrial customer will see an annual increase of 1.8 percent. The total impact on your bill will depend on how much gas you use.

#### Delivery to You

The delivery charges that vary with consumption decreased based on our forecast cost of delivering natural gas to your home or business. These charges include a facility carbon charge associated with the operation of Enbridge Gas' facilities to deliver natural gas to you.

#### Transportation to Enbridge

The transportation charge has decreased by approximately \$1.76 per year for a typical customer due to lower costs for transporting natural gas to Ontario.

#### Gas Supply Commodity Charge

The gas supply commodity charge has increased from 10.6652 ¢/m<sup>3</sup> to 10.8019 ¢/m<sup>3</sup> based on our forecast of natural gas market prices for the next 12 months.

#### Cost Adjustment

The current adjustment is a refund of 4.7254 ¢/m<sup>3</sup>. The cost adjustment accounts for the variance between actual and forecast prices from earlier periods. Please see the included chart for the breakdown by component.

#### Rate Adjustment

This rate adjustment reflects the difference between the amount customers paid for the energy conservation programs (DSM) from Jan. 1 to Dec. 31, 2023 and the actual costs incurred. This will appear on customers' July bills as a one-time refund of approximately \$470.28 for a typical customer.

Charges for gas used from July 1, 2026 will be calculated using the new approved rates as shown in the chart. The annualized impact is based on a typical Rate 10 - Union North West customer who uses 93,000 cubic metres (m<sup>3</sup>) per year.
