July 2025

Large Volume Customer Notice – Rate 145

## Natural Gas Prices Have Changed

The Ontario Energy Board (OEB) has approved changes to the rates Enbridge Gas charges its customers effective **July 1, 2025**.

On average, these changes will amount to an increase of approximately 1.5 percent annually. The total impact on your bill will depend on how much gas your organization uses.

Your current bill has been calculated using the new approved rates for gas consumed from July 1, 2025. The rate chart is included in this notice.

Our supply prices are based on a forecast of market prices for the next 12 months. The forecasted prices are reviewed every three months and adjusted accordingly. If our forecasts are over or under our actual costs, the difference is refunded or collected from customers through cost adjustments.

## Delivery to You

The delivery rates that vary with consumption decreased based on our forecast cost of delivering natural gas to your business. These charges include a facility carbon charge associated with the operation of Enbridge Gas' facilities to deliver natural gas to you. The facility carbon charge has decreased from 0.0172 cents per cubic metre (¢/m<sup>3</sup>) to 0.0123 ¢/m<sup>3</sup>.

The delivery rates on your bill also include a charge for the 2024 rate adjustment (Rider E) as approved by the OEB. Details for this rate adjustment can be found in the rate adjustment section below.

## Load Balancing Charge

The load balancing charge has decreased due to lower seasonal load balancing related costs.

## Transportation to Enbridge

The 'Transportation to Enbridge' charge has decreased due to lower costs for transporting natural gas to Ontario. The transportation charge also includes a charge for the 2024 rate adjustment (Rider E) as approved by the OEB. Details for this rate adjustment can be found in the rate adjustment section below.

## Federal Carbon Charge

The federal carbon charge was removed from customer bills effective April 1, 2025. Please note that your bill will show federal carbon charges incurred for any natural gas usage up to and including March 31, 2025.
