

Fixed Commercial and Industrial Customer Incentives

We can help you
reduce your energy
costs and improve
your bottom line!

EN029620

Our Customer Incentives

Enbridge Gas Distribution offers incentives to help offset the cost of installing energy efficient natural gas equipment in new and existing buildings.

Space Heating

Technology Incentive

'Condensing Boilers'

Up to 299 MBH, AFUE of 90% or Greater	\$600
---------------------------------------	-------

Condensing Furnaces**

Up to 74 KBTU/hr	\$100
75 to 149 KBTU/hr	\$150
150 to 225 KBTU/hr	\$200

Condensing Make-Up Air Units**

Single speed up to 14,000 CFM, Multi-family & Long-Term Care	\$0.15/CFM
Two speed up to 14,000 CFM, Multi-family & Long-Term Care	\$0.60/CFM
Single speed up to 14,000 CFM, Other Sectors	\$0.15/CFM
Two speed up to 14,000 CFM, Other Sectors	\$0.30/CFM

Condensing Unit Heaters**

30 to 100 KBTU/hr	\$150
125 to 200 KBTU/hr	\$300
225 to 300 KBTU/hr	\$450

Demand Control Ventilation*

Single Zone Retail	\$0.04/ft ²
Single Zone Offices	\$0.04/ft ²

Destratification Fans**

Minimum diameter of 20 feet, minimum of 25 foot ceilings	\$500
--	-------

Energy Recovery Ventilators**

No existing ERV or not required by code, minimum sensible heat recovery effectiveness of 65%	\$1.15/CFM
--	------------

Energy Recovery Ventilators Improved Effectiveness** (Replacement of Existing ERV)

65% to 74% sensible heat recovery effectiveness	\$0.35/CFM
75% to 84% sensible heat recovery effectiveness	\$0.75/CFM
85% or greater sensible heat recovery effectiveness	\$0.95/CFM

Heat Recovery Ventilators**

No existing HRV or not required by code, minimum sensible heat recovery effectiveness of 65%	\$0.85/CFM
--	------------

Heat Recovery Ventilators Improved Effectiveness** (Replacement of Existing ERV)

65% to 74% sensible heat recovery effectiveness	\$0.20/CFM
75% to 84% sensible heat recovery effectiveness	\$0.40/CFM
85% or greater sensible heat recovery effectiveness	\$0.60/CFM

'High Efficiency Boilers'

Up to 299 MBH, AFUE of 85% or Greater	\$600
300 to 599 MBH	\$600
600 to 999 MBH	\$850
1,000 to 1,499 MBH	\$1400
1,500 to 2,000 MBH	\$2200

'High Efficiency Boilers for School Boards'

Elementary Schools	\$1000
Secondary Schools	\$4300

Infrared Heaters**

Single stage up to 300,000 BTUs	\$100
Two stage up to 300,000 BTUs	\$100

Water Heating

Technology Incentive

Condensing Storage Water Heaters**

Elementary Schools, Offices, Retail, Churches	\$100
Secondary Schools, Fast Food Restaurants, Dormitories, Other	\$150
Fitness Centres, Full Service Restaurants, Hotels, In-patient Health Care, Multi-Residential	\$200

Condensing Tankless Water Heaters**

Elementary Schools, Offices, Retail, Churches, minimum of 75 KBTU/hr	\$100
Secondary Schools, Fast Food Restaurants, Dormitories, Other, minimum of 75 KBTU/hr	\$150

Fitness Centres, Full Service Restaurants, Hotels, In-patient Health Care, Multi-Residential, minimum of 75 KBTU/hr	\$200
---	-------

'Low-Flow Showerheads'

Multi-family residential buildings only. Replacement of an old showerhead 2.5 GPM or more with a new one at a flow rate of 1.5 GPM or less	\$6/showerhead
--	----------------

Ozone Laundry System*

Commercial Laundry Washing – Indicate whether tunnel vs. extractor washer	\$0.01 (x) total annual lbs. of laundry processed
---	---

Food Services

Technology Incentive

Demand Control Kitchen Ventilation System

Up to 5,000 CFM, Approved Manufacturers Only	\$1500
5,001 to 10,000 CFM, Approved Manufacturers Only	\$3000
10,001 to 15,000 CFM, Approved Manufacturers Only	\$5000

ENERGY STAR® Qualified Dishwashers*

Multiple Tank Conveyor, ENERGY STAR® Qualified, Indicate whether high vs. low temperature	\$600
Single Tank Conveyor, High Temperature, ENERGY STAR® Qualified	\$400
Under Counter ENERGY STAR® Qualified, Indicate whether high vs. low temperature	\$50

Stationary Rack, High Temperature, ENERGY STAR® Qualified	\$200
---	-------

ENERGY STAR® Qualified Natural Gas Fryers

ENERGY STAR® Qualified (Identify number of fryers and vats)	\$200
---	-------

ENERGY STAR® Qualified Natural Gas Steam Cookers

ENERGY STAR® Qualified	\$200
------------------------	-------

High Efficiency Under-Fired Broilers

Maximum Idle Energy Rate: 65,000 BTU/hr, Minimum Efficiency 34% (Indicate 3, 4, 5 or 6 foot)	\$200
--	-------

* Applicable to industrial customers for non-process, space heating or domestic water heating applications.

** Not applicable for New Construction Buildings.

Whether retrofitting or building new, we offer free services or financial incentives for buildings and budgets of every size. We'll guide the process from start to finish, making it easy to reduce energy consumption and improve your bottom line.

Custom Retrofit Incentives:

If your building needs energy-efficient upgrades not covered by our Fixed Incentives, Enbridge's Custom Retrofit Incentives may apply and you could earn up to 50% of your project cost. Contact your Energy Solutions Consultant (ESC) for details and to find out if your project qualifies.

Applying for an Incentive

How to submit incentive claims

Download a copy of the 2017 Fixed Incentive Application Form by visiting enbridgegas.com/incentiveforms. Choose either the Individual Claims form, or Multiple Claims form if you are submitting the incentive claims for multiple sites.

Complete, print and sign the form

Please ensure you use the same description for the technology on the application form as outlined in the table.

Submit the form

Email your completed and signed form with proof of purchase and installation to energyservices@enbridge.com

Contact your Enbridge Energy Solutions Consultant today to learn more about our Commercial and Industrial Incentives and start reducing your energy costs.

Terms and Conditions

All incentive offers are available to Enbridge Gas Distribution Inc., Ontario customers. Enbridge account must be in good standing. Incentive offers available between January 1, 2017 and December 8, 2017 (natural gas equipment must be installed by November 24, 2017). To receive any incentive, a completed Fixed Incentive Application Form and proof of purchase matched to the installation address must be provided to Enbridge no later than December 8, 2017. All Fixed Incentives are paid on a per unit basis unless otherwise indicated. Programs and incentives may be subject to change or cancellation without notice at any time. Enbridge makes no representation, warranty or guarantee regarding the projected savings of any energy-efficiency measure or performance of installed equipment. Enbridge reserves the right to independently verify application information and confirm installation. Additional terms and conditions may apply; please review the Fixed Incentive Application form and ask your Enbridge Energy Solutions Consultant.

- 1 **Condensing Boilers** - Incentive applies to condensing boilers with an AFUE of 90% or greater. Rental units are eligible. Not applicable for New Construction Buildings.
- 2 **Condensing Furnaces*** - For stand alone furnaces under 225 KBTU with an AFUE of 95% or greater.
- 3 **Condensing Make-up Air Units (MUA)*** - Incentive applies to the replacement of conventional MUA systems with constant speed motors and minimum combustion efficiency of 80%. Replacement MUA systems must be direct fired self-contained units using 100% outside air and a minimum combustion efficiency of 90% or greater. Direct fired refers to the process in which heat is transferred from the gas fired burner to the incoming fresh air by means of a heat exchanger. The two air streams are separated by the heat exchanger causing no cross contamination. MUA systems combined with demand control ventilation are not eligible for this offer but may be eligible for other Enbridge offers.
- 4 **Condensing Unit Heaters*** - Must have thermal efficiency of 90% or greater. Applicable to units up to 300 KBTU.
- 5 **Demand Control Ventilation** - For single zone retail and office area buildings ONLY. Non-partitioned open areas, with dedicated intake and exhaust and exhausted outdoors. All other single zone and multi-zone buildings require custom calculations. The system outdoor air volume shall be controlled in response to the zone CO2 levels and the system shall be designed and operated such that the zone is ventilated in compliance with ASHRAE Standard 62.1. Sensors measuring the concentration of CO2 in the zone must be of solid state type. The measured CO2 levels shall be used by the controller to reset outdoor air volume as zone population changes. The CO2 sensor appropriately located to provide reasonable average reading for the zone. Square footage for incentive purposes are only for the conditioned space monitored by the CO2 sensors. Systems with ERV or HRV are not eligible. The customer must declare their maintenance practices to be eligible for this incentive, a minimum incentive payment for eligible projects (or projects that meet the requirements) is \$150 per unit.
- 6 **Destratification Fans** - This measure is restricted to fans with a minimum diameter of 20 feet for use in warehousing, manufacturing, industrial or retail buildings with a minimum of 25 foot ceilings and forced air space heating, including unit heaters.
- 7 **Energy and Heat Recovery Ventilators Improved Effectiveness (ERV/HRV)*** - Minimum incentive payment for eligible projects is \$100 per unit. Incentive applies to ventilators used for space conditioning applications (not process heating) in common areas only. Replacement ventilators must be replacing an existing ERV/HRV with 55% energy recovery effectiveness as per Ontario Building Code 2017. Must have a sensible heat recovery effectiveness of 65%, 75% or 85% respectively and a total energy recovery effectiveness of 63%, 73% or 83% respectively for ERVs at 32°F. Not to be used where 100% fresh air is required, no recirculation is allowed by codes or standards, contaminants (gases and vapors) may be present and the ERV may bring them back into the breathing zone, systems where no DCV or scheduled setbacks are required or part of a restaurant exhaust system. Frost control must be used for an ERV where winter design temperature is below 0°F. For installations that have an electric humidification, the HRV incentive will apply.
- 8 **Energy and Heat Recovery Ventilators (ERV/HRV)*** - Minimum incentive payment for eligible projects is \$100 per unit. Incentive applies to ventilators used for space conditioning applications (not process heating) in common areas only where no ERV/HRV is required by Ontario Building Code. Must have a minimum sensible heat recovery effectiveness of 65% and a minimum total energy recovery effectiveness of 63% for ERVs at 32°F. Not to be used to recover energy from areas where 100% fresh air is required, no recirculation is allowed by codes or standards, contaminants (gases and vapors) may be present and the ERV may bring them back into the breathing zone, systems where no DCV or scheduled setbacks are required or part of a restaurant exhaust system. Frost control must be used for an ERV where winter design temperature is below 0°F. For installations that have an electric humidification, the HRV incentive will apply.
- 9 **High Efficiency Boilers** - Incentive applies to the replacement of atmospheric boilers operating in a continuous loop. Replacement boilers must be non-atmospheric hydronic boilers. Schools are not eligible for this offer. Rental units are eligible. Not applicable for New Construction Buildings.

Space Heating

Boilers under 300 MBH:

Must have an AFUE of 85% or greater

Boilers 300 MBH to 2,000 MBH:

Must have a thermal efficiency of 85% to 88%
Limit two per end use per address

Domestic Water Heating

Boilers under 300 MBH:

Must have an AFUE of 85% or greater

Boilers 300 MBH to 1,500 MBH

Must have a thermal efficiency of 85% to 88%
Limit two per end use per address

- 10 **High Efficiency Boilers for School Boards** - Incentive applies to the replacement of atmospheric boilers operating in a continuous loop used solely for space heating in elementary and high schools only. Replacement boilers must be non-atmospheric hydronic boilers between 300 to 2,000 MBH with 85% to 88% thermal efficiency. Limit one incentive payment per school address. Not applicable for New Construction buildings.
- 11 **Infrared Heaters*** - Incentive applies to the replacement of unit heaters only.
- 12 **Condensing Storage Water Heaters*** - Must be replacing an existing storage water heater. Applicable units must be 75 MBH or greater and have a thermal efficiency of 94.5% or greater.
- 13 **Condensing Tankless Water Heaters*** - Applicable units must be 75 KBTU or greater and have a thermal efficiency of 93% or greater.
- 14 **Low-flow Showerheads** - Incentive applies to the replacement of standard showerheads (with a flow rate of 2.5 GPM or greater) in existing multi-family residential rental buildings that use natural gas for water heating. Replacement low-flow showerheads must have a flow rate of 1.5 GPM or less. Existing showerhead flow rate testing is required for a minimum of 10% of the total number of residential suites. Not applicable for New Construction buildings.
- 15 **Ozone Laundry System** - Incentive applies to hotels, motels, healthcare facilities, and other commercial facilities that use natural gas for water heating. Rental units are eligible.
- 16 **Dishwashers** - Rental units are eligible.
